Waiting for TEDS25: the Thermal Energy Decarbonisation Summit is happening in Vitoria-Gasteiz on 19th - 20th February 2025

TEDS25 is the summit on decarbonisation in the high temperature heat industrial sector organised and hosted by **CIC energiGUNE**, coordinator of the LIFE HI4S consortium. The event is taking place on **19th – 20th February 2025** at the **Álava Technology Park**, in Vitoria-Gasteiz, Spain.

TEDS25 is organised in the framework of the LIFE HI4S project, as the project itself aims at broadening the current state of knowledge and understanding of decarbonisation of the thermal energy industry and elaborating innovative strategies to achieve decarbonisation goals in this sector. The summit will give specialists and stakeholders the possibility to exchange views and experiences and develop an **enriching discussion on the future of industrial thermal energy decarbonisation**.

Participants will have the opportunity to interact with industry leaders and explore innovative decarbonization strategies for industrial thermal energy, policy-making and cutting-edge technologies like power-to-heat, solar-to-heat, heat upgrade, waste heat recovery, and emerging market opportunities. TEDS25 is the place to be for those who want to gain valuable insights on **how to successfully meet their decarbonisation goals**. The summit is a hub for idea-driven technology developers, industry professionals and policy makers to connect, share knowledge and perspectives, cooperate and take the next, innovative steps towards thermal energy decarbonisation.

TEDS25 is a **free event**: to take part in it, participants have to **sign up by 17th February** at the following [LINK](#)

TEDS25 offers a **rich program**, with several significant topics to be addressed by outstanding speakers. The program also includes a **visit to the Arcel Mittal plant located in Sestao**, where the **pilot plant** developed by the LIFE HI4S project is located. Visitors will be able to see the concrete outcome of the LIFE HI4S team's hard work, i.e. an example of the feasibility of off-gas streams heat waste recovery implementing a steel slag-based thermal energy storage system.

Additionally, participants are given the opportunity to play an active role in the summit, by **showcasing their own research in a poster** to contribute to the discussion on thermal decarbonisation strategies by sharing their experience and perspective.

TEDS'25

THERMAL ENERGY
DECARBONIZATION SUMMIT:

FEBRUARY 19 & 20, 2025

HIGH TEMPERATURE HEAT
INDUSTRIAL DECARBONIZATION

PROGRAM

CIC
energi
GUNE
MEMBER OF
BASQUE RESEARCH
& TECHNOLOGY ALLIANCE

19th FEB 25

8,30h: Registration
9,00h: Welcome
Policy making
Power to heat
Solar to heat
Heat Upgrade
Waste Heat Recovery
Round table discussion
New market opportunities
CIC energiGUNE's Visit

20th FEB 25

Visit to Arcelor Mittal Sestao premises

Deadline for abstract submission: January 20, 2025
Note of acceptance: January 24, 2025
Deadline for Registration: February 17, 2025

19 FEB 25

8,30h: Apertura acreditaciones
9,00h: Acto de bienvenida
Desarrollo de políticas
Electrificación del calor
Energía solar térmica
Mejora de la calidad de la energía térmica
Recuperación de calor residual
Mesa redonda
Nuevas oportunidades de negocio
Visita a CIC energiGUNE

20 FEB 25

Visita a instalaciones de Arcelor Mittal Sestao

Fecha límite envío resúmenes: 20 enero 2025
Notificación de aceptación: 24 enero 2025
Fecha límite inscripción: 17 febrero 2025
